# Moving Interface Problems And Applications In Fluid Dynamics Program On Moving Interface Problems An

**immersed interface methods for moving interface problems** - the immersed interface method for certain one-dimensional nonlinear problem with a fixed interface. however, for the interface problems discussed here the interface is unknown and moving, and the discrete difference scheme is a nonlinear system of equations involving both the solution and the interface. **moving interface problems: methods & applications tutorial ...** - moving interface problems—fundamentals dynamics of heterogeneous continuum systems • systems composed of different phases and materials, separated by a sharp interface whose location changes with time • the physics is well described by continuum theories • the systems are sufficiently large so that simulations **moving interface problems: methods & applications tutorial ...** - moving interface problems—front tracking  $e_1$   $e_2$   $new_1$   $new_2$  as the interface stretches and deforms, some parts are depleted of points while other parts become crowded by points. to maintain a nearly uniform resolution of the interface it is necessary to use dynamic regridding. regridding can be achieved by 1. adding elements 2. deleting elements ... **multi-scale modeling of moving interface problems with flux ...** - multi-scale modeling of moving interface problems with flux and ... problems involving reaction and species diffusion involve field and flux jumps at a moving reaction front. in multi-scale problems such as carbon fiber composite oxidation, these effects need to be tracked at the microscopic scale of individual carbon fibers. a multi-scale ... **flow simulation inside packaging machines: moving ...** - key words: cfd; space-time fem, moving interfaces, mesh update method, vr-ssmum, multiphase flow, level set method, packaging machines. we will focus on the flow simulation inside packaging machines and the associated moving interface problems. typically, the packages are transported through the machine on a conveyor belt. **multi-scale homogenization of moving interface problems ...** - multi-scale homogenization of moving interface problems with flux and field jumps by sangmin lee a dissertation submitted in partial fulfillment of the requirements for the degree of a **meshless approach to capturing moving interfaces in ...** - a meshless approach to capturing moving interfaces in passive transport problems l. mai-cao\* and t. tran-cong† october 21, 2008 abstract this paper presents a new meshless numerical approach to solving a special class of moving interface problems known as the passive transport where an ambient flow characterized by its **fast implicit methods for stiff moving interfaces** - 1.6. stiff problems the interface velocity  $v$  often depends on the moving interface  $\Gamma(t)$  in a stiffly-stable way. local geometric problems such as mean curvature flow  $v = -cn$  and surface diffusion  $v = (\Delta c)n$  are equivalent to stiff nonlinear parabolic pdes for the implicit interface representation  $\phi$ . nonlocal problems of materials **new cartesian grid methods for interface problems using ...** - such a difficulty becomes even more severe for moving interface problems because a new grid has to be generated at each time step. few publications can be found on using body fitting grids to solve moving interface problems with topological changes such as merging and splitting. **a new finite element for interface problems having robin ...** - lem includes the time-dependent problems which may have a moving interface [24, 33, 38, 42], for instance, the incompressible navier-stokes equations for two fluids [19, 36] and an solid/solid or solid/fluid interaction problems [8, 9, 22]. in most of those examples, the primary variables, such as heat, potential, displacement **kinetic modelling of diffusion-controlled, two-phase ...** - modelling simul. mater. sci. eng. 1 (1993) 505-516. printed in the uk kinetic modelling of diffusion-controlled, two-phase moving interface problems yunhong zhou and thomas h north department of metallurgy and materials science, university of toronto, ontario, canada received 24 july 1992 accepted for publication 29 october 1992 abstract a fast and accurate fully implicit finite difference model ...
